Enrollment Projections Listening Sessions with Wilder Research

In 2022, Red Lake Nation contracted with Wilder Research to conduct a study and produce population projections for the tribe. The purpose of this study is to help Red Lake Nation and its tribal citizens better understand population trends, and specifically understand the tribe's population trajectory under the current tribal enrollment criteria and alternative scenarios. Population projections through the year 2122 were completed under six different scenarios for tribal enrollment criteria.

These listening sessions are being held to inform our Tribal Membership of the study findings.
